Dear Parent/Carer,

Download the latest Eduspot mobile app to keep in touch

It has been recommended that parents download the latest mobile app which will combine Teachers2parents text service app and School Money App into one. Eventually the school money app and Teachers2parentst app will become obsolete.

The Eduspot app will make home-school communication easier, more effective and more accessible. Eduspot is completely free, and available on the App Store (for Apple iPhone or iPad) or on Google Play (for Android smartphones or tablets).

Benefits of using the app

- Get instant notifications for new messages from school
- View all updates from connected school systems in one clear timeline, School Money and text messages will be combined in one app
- Make payments for meals, trips, clubs and more

If you have children in different schools where Eduspot is also used, you will be able to view messages and information about multiple children with a single login for the app.

Getting started with the app

Please find "Eduspot" on the App Store/Google Play and install it. For more help with installing the app and logging in, visit: parents.eduspot.co.uk/getting-started or refer to the attached guidance.

Please can we request that the Eduspot App is installed by 2nd April.

If you have any difficulty installing the App please contact the School Office.

Yours Sincerely

Mrs Price
Headteacher

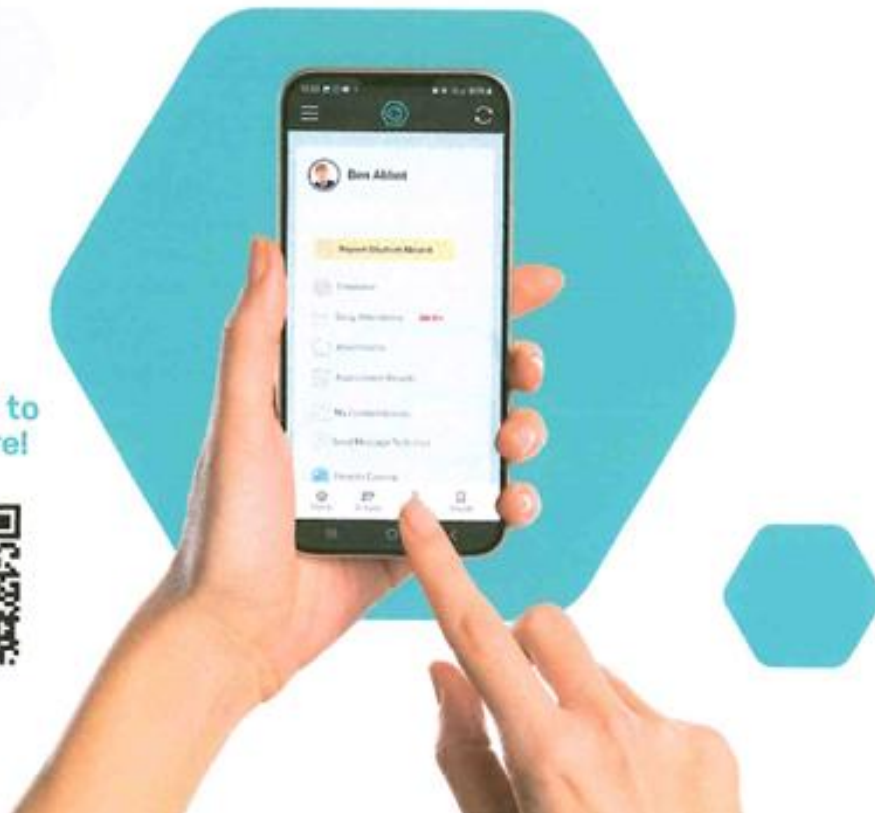

Eduspot

Download the app to stay **in the loop**

The Eduspot mobile app enables you to keep up with messages from school, with a personalised timeline of all your children's school activities and updates. **Download the app today!**

GETTING STARTED

Installing the app

See below for complete instructions on downloading, installing and setting up the Eduspot app.

STEP 1

Check which app you need to install

Firstly, please make sure you're searching for the correct app. The Eduspot app (formerly known as Groupcall Xpressions) works with several communications platforms, but you can only use the Eduspot app if that's what your school has chosen to use.

If you have been instructed by your school to install the Eduspot app or the Xpressions app, then Eduspot is the correct one. If you have been instructed to get the Teachers2Parents app, this is a different app which only works with Teachers2Parents. Again, your school determines which app they use.

STEP 2

Install the Eduspot app

Confirmed that your school is using the Eduspot app? You can download it using the links below, or find it yourself on the App Store (for iOS devices) or Google Play (for Android devices). The app is completely free to use.

**STEP 3**

Enter your contact details

When you first open the app, you will be asked to enter your email address and phone number. All personal details will be taken from your school's records, so the information you provide needs to match what they have on file.

If you are unable to enter details successfully, you will need to speak to your school office. If you are sure you have entered information correctly but you still see an error message, it is likely that the school records are incorrect, so please contact your school.

STEP 4

Enter the confirmation code

Next, you will receive a confirmation code via text message to confirm your identity for security reasons. There may be a short delay receiving your code. If you haven't received it after waiting at least 5 minutes, there will be an option to resend a code.

STEP 5

Create a password (recommended)

It is recommended that you create a password for your account at this stage. If you need to login again, or on another device, having a password will make the process easier. Please see our recommendations for [Setting a strong password](#).
